

ELEGANT SMART WATCH WITH PULSE AND BLOOD PRESSURE METER

A smart watch with a full touchscreen is a great aid in helping you keep fit and improving your physical condition. The watch has a high-resolution touchscreen making it very easy to read even in low light. DIY Dial background from a loaded application. A very comfortable multisports watch. Monitors physical strain, number of steps taken, distance travelled, calories burned, quality of sleep, blood pressure, heart rate and blood oxygen saturation. It calculates overall fatigue strain. The watch can be connected to a smartphone, allowing it to display incoming telephone calls, text messages and notifications from various applications such as social networks like Facebook and Twitter. Able to control a music player. Waterproof and dustproof in line with the IP67 standard. The clear Wearfit application looks after measuring and calculation of values. In combination with the watch, the application provides a useful overall overview of the user's physical health. Comes with a metal or silicone strap.

Product code: BRA045

Minimum order: 1000 pcs

Availability: 2 - 4 weeks

More parameters:

Smart watch. In connection with the corresponding mobile application, it provides an overview of the wearer's sporting performance and basic information about his or her physical fitness. Elegant look and quality finish.

Chipset: Huntersun

Sensors: Accelerometer (pedometer), Optical oximeter (measuring PPG (photoplethysmogram values), heart rate and blood pressure by sensing changes in the colour of blood-perfused and non-perfused skin).

Phone connection and data transfer: Bluetooth transfer protocol, pairing only at the application level (the band is paired only using the corresponding function in a pre-launched application), automatic and manual synchronization of obtained data with a mobile phone application, transfer of notifications and messages.

Control interface: colour touchscreen, 1.3" TFT

Operating system: iOS 8.0 and higher, Android 4.4 and higher

Bluetooth version: 4.0 or higher

Water resistance: IP67

GPS location detection using a paired mobile phone

Battery: Li-pol 170 mAh

Power supply: power cable (USB-A and magnetically fixed adaptor) DC 3.7 V, 0.18 A

Battery life: up to 7 days

Material: metal, silicone

Control application: WearFit (in English)

Features: Pedometer, calculation of calories burnt, calculation of distance walked, sport timer

Sleep monitor

Heart rate measurement

Blood pressure measurement (PPG)

Customisable (DIY) display background

Control of a music player in a paired telephone

Transfer of SMS, incoming call notifications, notifications of received application messages, alarms, sedentary and drink reminders
