

## WIRELESS MOUSE 2.4 GHZ WITH WIRELESS CHARGING, CMYK + LED LOGO

Do you need a precise yet elegant mouse for your everyday work and travel? A wireless mouse with wireless charging is a great option. The modern design gives off a great impression at first glance. A great advantage is wireless charging with the aid of induction technology, when all you need to do is place it on a wireless charging pad or wireless charging mouse pad. We also offer a combined alternative - Mouse + wireless charging pad set. The wireless mouse is made of plastic and thanks to its compact size, will easily fit in your bag. To make the wireless mouse even more interesting and even more of a talking point, you can add a colour CMYK print to it all over the visible area. Its uniqueness lies in the combination of full-area printing and transparent ergonomic part ensuring it is comfortable to hold during work.
