

## High-capacity metal slim power bank (external charger) 15000/20000 mAh

HIGH-CAPACITY METAL SLIM POWER BANK (EXTERNAL CHARGER) 15000/20000 mAh This power bank in an elegant metal case has enormous capacity and assures sufficient power for your portable devices on longer trips. It is dual, which means it can charge two devices at once and processor controlled power distribution ensures that both devices are charged optimally. The power bank's remaining capacity is shown on a clear LED display. A large area for printing or laser engraving. The power bank is charged via a computer USB connector (or mains adapter), and you can then charge your mobile telephone or other device via micro USB or another connector. The fully charged power bank provides 5-7 charges for a mobile telephone depending on its battery capacity. Charges iPhones, mobile telephones, MP3 players and cameras etc.

**Product code:** PBA20020  
**Minimum order:** on request  
**Availability:** na dotaz

### More parameters:

Battery: 15000/20000 mAh (type Li-Ion 7 elements)  
 Input value: micro USB 5V/2400 mA (max.)  
 Output value: 2xUSB 5 V, totalling 2400mA (max.) intelligent current distribution  
 Material: aluminium sheet, plastic ends  
 Packaging: PVC blister pack  
 Suitable for: iPhones, smartphones, MP3/MP4 players and iPods etc.
